GOOD TO KNOW

THE BIGGEST ADVANTAGES OF HANS KRUG CABINETRY

SLIM-LINE TECHNOLOGY

Our cabinets are built using SLIM-LINE (PUR-TERMO-SET) technology, the industry leading edge banding process which results in water resistant joints, standard for all cabinet interiors.

HEALTH SAFETY

Our products are made using certified materials that meet or exceed industry standards. Using sealed surfaces and dense, non-porous surfaces makes our products safer.

MOISTURE RESISTANCE

7 layer lacquer on all sides and edges of lacquered parts create a compact and closed surface which is completely waterproof. The new edge gluing technology with the help of polyurethane-based glues create a watertight connection and thus prevents the entrance of atmospheric humidity and water into the interior of units.

ENVIRONMENTALLY FRIENDLY

We do our best to keep our production environmentally friendly. We have been awarded certificates for Quality Management Control ISO 9001 and for Environmental Management System ISO 14001. We work to continually improve the quality of our products and services, and therefore we are able to meet the changing requirements and wishes of our customers.

THE MOST ADVANCED TECHNOLOGY

We use the most advanced processes and highest quality finishes for our cabinetry. Our lacquers have an MDF core that is covered on both sides and all edges in five layers of acrylic paint, each layer is individually cured with UV radiation. After curing, two final layers of polyurethane lacquer are applied in a high gloss or matte finish. The result is a flawless finish which is resistant to moisture and high temperatures (up to 932 degrees F) and also has the highest possible degree of shine that cannot be achieved with any other technology.

For veneers, a sheet of natural wood covers the MDF core which is then coated with four layers of transparent acrylic urethane lacquer in high gloss or matte, thus creating a perfectly sealed veneer. We never use water-dilutable lacquers because they do not have the required resistance. Our state-of-the-art technology for lacquer application and toxic substance incinerator allows us to work only with high-end lacquers based on polyurethane.

CERTIFICATES

ALL ABOUT THE DETAILS

We have an extended selection of accessories you can add to the cabinetry, making it even more functional and organized.

CUTLERY DIVIDERS
keep everything in its place

SERVO-DRIVE
soft touch motorized door operating systems

DRAWER TYPES
several options for drawer types and finishes

CONVOY CENTRO
elegant pull out pantry, motorized option available

LE MANS
corner cabinet optimization hardware for unobstructed access and efficient use

INTERNAL DRAWERS AND PULL OUT SYSTEMS FOR PANTRIES
in pull out drawer is the most commonly used to describe „hidden drawer“

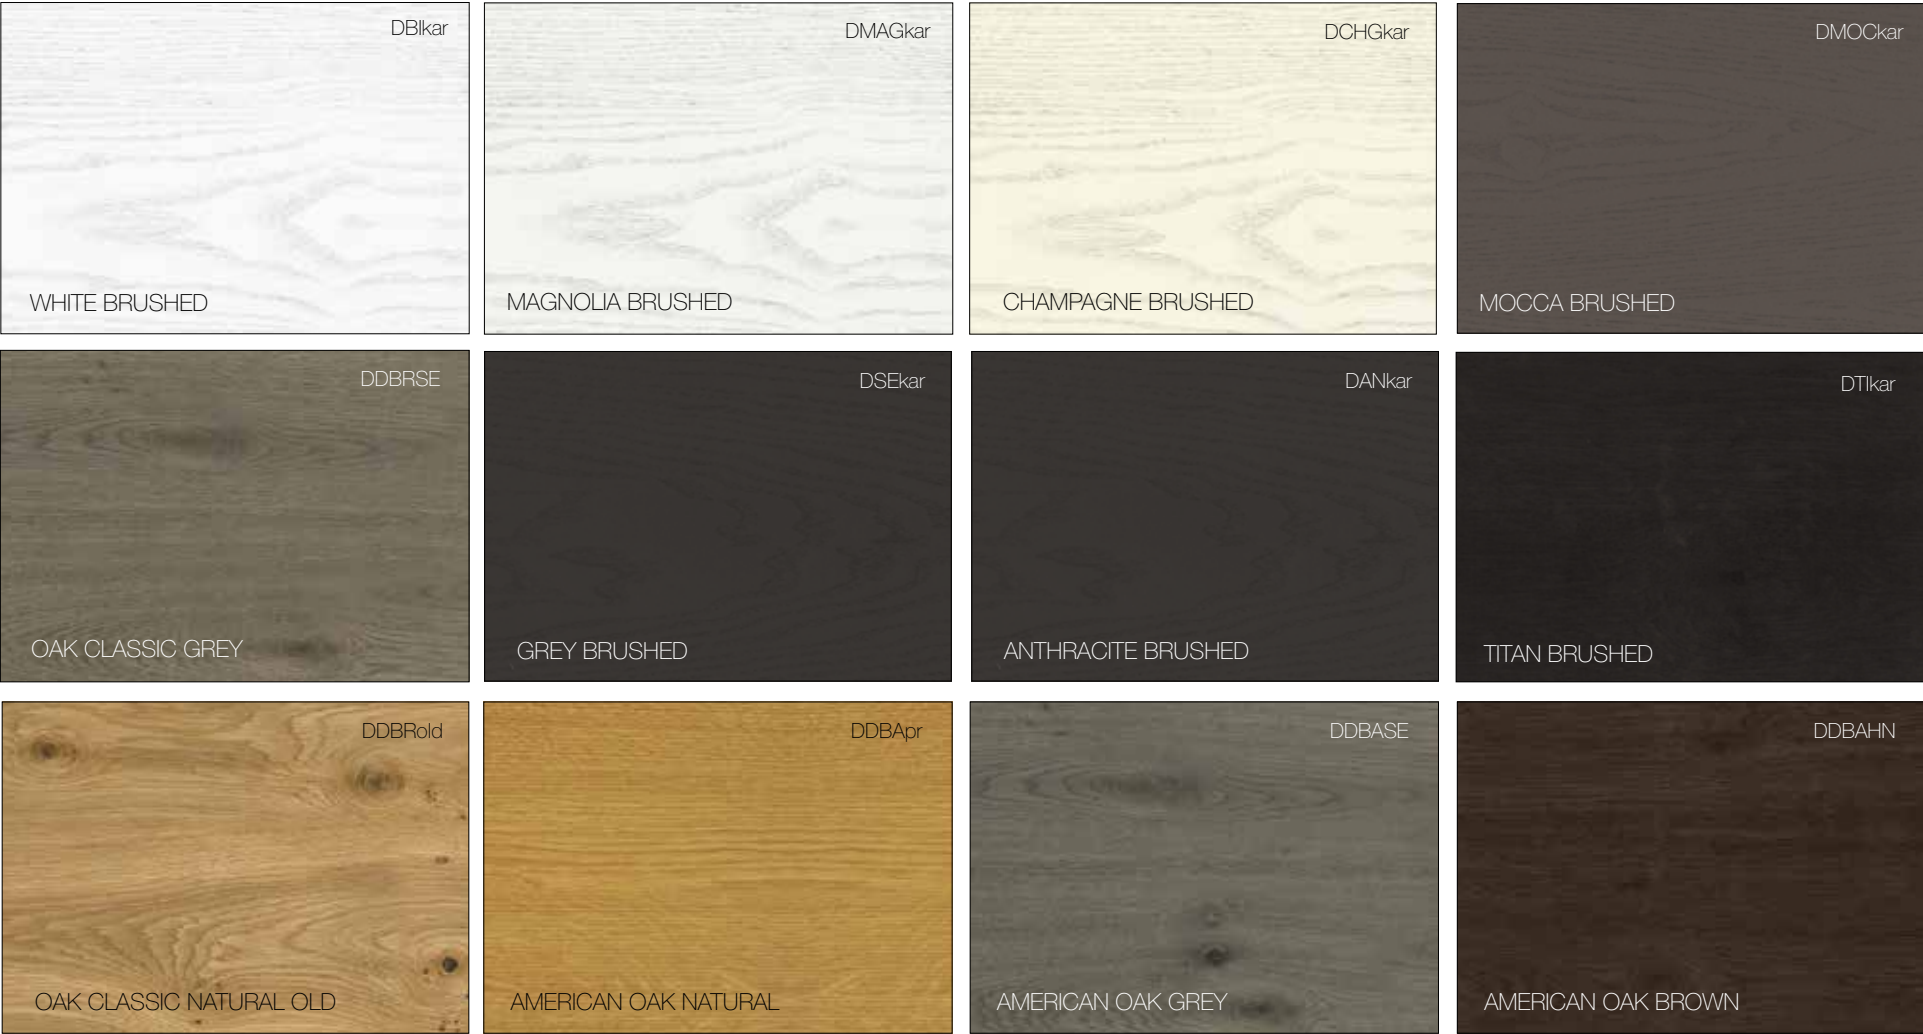

CABINET LIGHTING
our products offer a full array of lighting options including, interior drawer lights
